*Corps Commanders* examines how five strikingly-dissimilar British and Canadian generals fought battles and fit into the British Empire armies of the Second World War. The three Canadians controlled British formations and served under British army commanders, and the two Britons worked for and led Canadians as well. Such inter-army adjustments were fairly simple because all Anglo-Canadian commanders and staffs spoke the military language of the Camberley and Quetta staff colleges. Gunners from Montreal understood guardsmen from London -- no small advantage when coordinating coalition battles involving thousands of troops. Delaney's book offers invaluable insight into interoperability and how men animate armies in war.

The cancellation of the CF-105 Arrow in 1959 holds such a grip on the Canadian imagination that earlier developments in defence procurement remain obscure. Randall Wakelam corrects this oversight – and offers fresh insight on the AVRO saga and contemporary procurement issues – by revealing how cabinet ministers, chiefs of staff, and air marshals negotiated competing pressures to arm the air force, please allies, and save money during a decade when Canada's air force was growing by leaps and bounds. The result was the CF-100 Canuck and the F-86 Sabre, Canada's front-line defensive aircraft in the coldest years of the Cold War.

In December 1941, Japan attacked multiple targets in the Far East and the Pacific, including Canadian battalions in Hong Kong. This intriguing account of Canadian intelligence gathering and strategic planning on the eve of the crisis dispels the assumption that the Allies were totally unprepared for war. Canadians worked closely with their US and Allied counterparts to uncover Japan's intentions – including an attack on Pearl Harbor – and to develop a strategic plan for defence. By highlighting Canada's role as a Pacific power, this book sheds new light both on the Pacific War and on events that led to the creation of the Grand Alliance.

*Extremely well-researched and written, Defence and Discovery brings together existing pieces of the story of Canada's space effort into a comprehensive historical analysis, through access to new primary archival material. Godefroy demonstrates a mastery of the technical-scientific elements of Canada's initial space research and development programs, and delves into the political-bureaucratic forces at play, as well.*

– James Fergusson, author of *Canada and Ballistic Missile Defence, 1954-2009: Déjà vu All Over Again*

The Cold War space race between the United States and the Soviet Union is well documented, but few are aware of Canada's early activities in this important arena of global power. *Defence and Discovery* represents the first comprehensive investigation into the origins, development, and impact of Canada's space program from 1945 to 1974. Meticulously researched, it demonstrates the central role of the military in Canada's early space research, illuminating a significant yet understudied period in Canada's growth as a nation.

*This is an important and original history of the Canadian Army's overseas public relations during the Second World War that is based on impressive research in Canadian, US, and UK primary sources.*

– J.L. Granatstein, author of *Canada's Army: Waging War and Keeping the Peace*

In wartime, capturing the hearts and minds of the citizenry is arguably as important as victory on the battlefield. *The Information Front* explores the Canadian military's use of public relations units to manage news during the Second World War. These specialized units were responsible for providing sufficient and positive news coverage to Canadians at home. This fascinating study traces the transformation of an emergent PR organization into an efficient publicity machine. It also scrutinizes news coverage and PR activities during major Canadian operations at Dieppe, Sicily, and Normandy to reveal how the military used censorship and propaganda to rally support for the war effort.

*This is important scholarship. It is the first history of Canada and ballistic missile defence, placing the most recent debates in the context of more than fifty years of developments and revealing recurring (and lamentable) patterns of Canadian decision making. Moreover, it also sheds needed light on Canadian involvement in NORAD, Canada-US relations more broadly, and how important defence decisions are made in Canada.*

– Joseph Jockel, author of *Canada in NORAD, 1957-2007: A History*

Since the mid-1950s, successive Canadian governments have responded to US ballistic missile defence initiatives with fear and uncertainty. Officials have endlessly debated the implications – at home and abroad – of participation. Drawing on previously classified government documents and interviews with senior officials, James Fergusson offers the first full account of Canada's unsure response to US initiatives. He reveals that factors such as weak leadership and a tendency to place uncertain and ill-defined notions of international peace and security before national defence have resulted in indecision. In the end, policy-makers have failed to transform the ballistic missile defence issue into an opportunity to define Canada's strategic interests at home and on the world stage.

*Militia Myths is an engaging and important book. It revises our understanding of military professionalism in the early twentieth century. Wood shows the distinction between amateur and professional soldiers in modern warfare to be more complex than we have come to believe. His work is sure to stimulate further study of the pre-1914 period and the impact of the Great War on Canada's armed forces.*

– Andrew Iarocci, author of *Shoestring Soldiers: The 1st Canadian Division at War, 1914-15*

This cultural history of the amateur military tradition traces the origins of the citizen soldier ideal from long before Canadians donned khaki and boarded troopships for the Western Front. Before the Great War, Canada's military culture was in transition as the country navigated an uncertain relationship with the United States and fought an imperial war in South Africa. *Militia Myths* explores the ideological transformation that took place between 1896 and 1921, arguing that by the end of the War, the untrained citizen volunteer had replaced the long-serving militiaman as the archetypal Canadian soldier.

*Isitt's work is new, innovative, and important. He deftly weaves the Canadian working class opposition to war and the rising leftist sentiment among workers with the inner life of the Siberian Expedition itself. That inner life included opposition to the Siberian venture among a substantial section of the contingent. No less important, he melds a national story with an international one.*

– Larry Hannant, editor of *The Politics of Passion: Norman Bethune's Writing and Art*

This groundbreaking book brings to a life a forgotten chapter in the history of Canada and Russia – the journey of 4,200 Canadian soldiers from Victoria to Vladivostok in 1918 to help defeat Bolshevism. Combining military and labour history with the social history of BC, Quebec, and Russia, Benjamin Isitt examines how the Siberian Expedition exacerbated tensions within Canadian society at a time when a radicalized working class, many French-Canadians, and even the soldiers themselves objected to a military adventure designed to counter the Russian Revolution. The result is a highly readable and provocative work that challenges public memory of the First World War while illuminating tensions – both in Canada and worldwide – that shaped the course of twentieth-century history.

– Tim Cook, author of *Shock Troops: Canadians Fighting the Great War, 1917-1918*

History has told us something about our war dead but very little about our war wounded. *Veterans with a Vision* provides a vibrant, poignant, and very human history of Canada's war-blinded veterans and of the organization they founded in 1922, the Sir Arthur Pearson Association of War Blinded. Serge Durflinger details the veterans' process of civil re-establishment, physical and psychological rehabilitation, and social and personal coping and describes their public advocacy for government pension entitlements, job retraining, and other social programs. This book captures the spirit of perseverance that permeated the veterans' community and highlights the accomplishments of the war blinded as advocates for all Canadian veterans and for all blind citizens.

– Hector Mackenzie, Senior Departmental Historian, Department of Foreign Affairs and International Trade

In 1960 the Republic of Congo teetered near collapse as its first government struggled to cope with civil unrest and mutinous armed forces. When the UN established a peacekeeping operation to deal with the crisis, the Canadian government faced a difficult decision. Should it support the intervention? By offering one of the first detailed accounts of Canadian involvement in a UN peacekeeping mission, Kevin Spooner reveals that Canada's involvement was not a certainty: the Diefenbaker government had immediate and ongoing reservations about the mission, reservations that challenge cherished notions of Canada's commitment to the UN and its status as a peacekeeper.

## Kiss the kids for dad, Don't forget to write

The Wartime Letters of George  
Timmins, 1916–18

Edited by Y.A. Bennett

Between 1916 and 1918, Lance-Corporal George Timmins, a British-born soldier who served in the Canadian Expeditionary Force, wrote faithfully to his wife and children. Sixty-three letters and four fragments survived. These letters tell the compelling story of a man who, while helping his fellow Canadians make history, used letters home to remain a presence in the lives of his wife and children, and who drew strength from his family to appreciate life's simple pleasures. Timmins's letters offer a rare glimpse into the experiences, relationships, and quiet heroism, of ordinary soldiers on the Western Front.

## Crisis of Conscience

Conscientious Objection in Canada  
during the First World War

Amy J. Shaw

The First World War's appalling death toll and the need for a sense of equality of sacrifice on the home front led to Canada's first experience of overseas conscription. While historians have focused on resistance to enforced military service in Quebec, this has obscured the important role of those who saw military service as incompatible with their religious or ethical beliefs. *Crisis of Conscience* is the first and only book about the Canadian pacifists who refused to fight in the Great War. The experience of these conscientious objectors offers insight into evolving attitudes about the rights and responsibilities of citizenship during a key period of Canadian nation building.

## Renegades

Canadians in the Spanish Civil War  
Michael Petrou

Shortlisted for the  
2009 OTTAWA  
BOOK AWARD,  
NON-FICTION

Between 1936 and 1939, almost 1,700 Canadians defied their government and volunteered to fight in the Spanish Civil War. They left behind punishing lives in Canadian relief camps, mines, and urban flophouses to confront fascism in a country few knew much about. Michael Petrou has drawn on recently declassified archival material, interviewed surviving Canadian veterans, and visited the battlefields of Spain to write the definitive account of Canadians in the Spanish Civil War. *Renegades* is an intimate and unflinching story of idealism and courage, duplicity and defeat.

## An Officer and a Lady

Canadian Military Nursing and the  
Second World War  
Cynthia Toman

During the Second World War, more than 4,000 civilian nurses enlisted as Nursing Sisters, a specially created all-female officers' rank of the Canadian Armed Forces. They served in all three armed force branches and all the major theatres of war, yet nursing as a form of war work has long been under-explored. *An Officer and a Lady* fills that gap. Cynthia Toman analyzes how gender, war, and medical technology intersected to create a legitimate role for women in the masculine environment of the military and explores the incongruous expectations placed on military nurses as "officers and ladies."

Tim Cook

*Clio's Warriors* examines how the Canadian world war experience has been constructed and reconstructed over time. Tim Cook elucidates the role of historians in codifying the sacrifice and struggle of a generation as he discusses historical memory and writing, the creation of archives, and the war of reputations that followed each of the world wars on the battlefield. Only recently have military historians pushed the discipline to explore the impact of war on society. In analyzing where the practice of academic military history has come from and where it needs to go, *Clio's Warriors* plays a vital role in the ongoing challenge of writing critical history.

**TIM COOK** is the curator of the Canadian War Museum. He is the author of *No Place to Run: The Canadian Corps and Gas Warfare in the First World War* (1999-2000), which won the C.P. Stacey award for best book in Canadian military history.

## After Tippecanoe

Some Aspects of the War of 1812  
Edited by Philip P. Mason

In 1811, as Shawnee chief Tecumseh attempted to form a confederacy of tribes to stem white settlement in the Old Northwest, Americans marched to his village at the mouth of Tippecanoe Creek. The ensuing battle ended all hope of an Indian federation and had far-reaching effects on American and British relations. The British, blamed for providing the Indians with arms, drew the ire of hawks in Congress, who clamored ever more loudly for a war to end England's power in North America. Revised with a new introduction and updated biographical information, *After Tippecanoe* contains six papers originally presented as lectures in 1961-62 by American and Canadian historians.

## The Sixty Years' War for the Great Lakes, 1754–1814

David Curtis Skaggs and Larry L. Nelson

Between 1754 and 1814, several military struggles ensued over many generations for control of the Great Lakes region. The twenty essays in this collection concern not only military and naval operations, but also the political, economic, social, and cultural interactions of individuals and groups during the struggle to control the great freshwater lakes and rivers between the Canadian Shield and the Ohio Valley. These essays represent fresh and insightful approaches to the understudied history of the region and the multifaceted wars that did so much to shape it.

## Napoleonic Friendship

Military Fraternity, Intimacy, and Sexuality in Nineteenth-Century France

Brian Joseph Martin

Following the French Revolution, radical military reforms created conditions for new physical and emotional intimacy between soldiers. Based on extensive research in French and American archives, and enriched by his reading of Napoleonic military memoirs and French military fiction, Brian Joseph Martin encompasses a broad range of emotional and erotic relationships in French armies from 1789 to 1916. He argues that the French Revolution's emphasis on military fraternity evolved into an unprecedented sense of camaraderie among soldiers in the armies of Napoleon. This radical transformation in social relations between soldiers led to the emergence of homosexual soldiers and a homosexual military subculture during World War I.

The *Freedom of Security* brings new and provocative perspectives to bear on Canadian politics. Arguing that security should not be seen as a trade-off between liberty and security, but as a reconfiguration of structures of governance with security at their centre, Bell provides a much-needed intervention into debates over foreign policy.

– Michael Williams, author of *Culture and Security: Symbolic Power and the Politics of International Security*

Post-9/11 security measures have sparked fears that the West is violating the very civil rights it strives to protect. Debates centre on the United States, but how have the politics of security influenced the commitment to freedom in other liberal democracies? Addressing security certificates to the War in Afghanistan to the detainment of Abdullah Almalki, Colleen Bell's wide-ranging analysis demonstrates that Canada's counter-terrorism practices are not a departure from liberal governance but rather a reconfiguration of its structures with an emphasis on security. She traces how the logic and practices of security are increasingly coming to define our rights and freedoms.

Selected as one of *Embassy's* Top 20 reads of 2010

*This important book is the only study to connect temporally the history of maritime helicopter operations, the Sea King helicopter replacement, and the political realities of weapons acquisition in Canada. It clearly adds to the ongoing debate about the purpose of purchasing military weapons: Providing the best equipment for the military or contributing to regional economic and industrial base development? The Politics of Procurement should be read by all those interested in civil-military relations and the military profession.*

– Craig Stone, Department of Defence Studies,  
Canadian Forces College

In 1993, Canada's Liberal Party cancelled an order to replace the navy's *Sea King* helicopter. It claimed that the Tory plan was too expensive, but the cancellation itself actually cost taxpayers hundreds of millions of dollars. Aaron Plamondon connects this incident to the larger evolution of defence procurement in Canada, revealing that partisan politics, rather than a desire to increase the military's capabilities, have driven the military procurement process. This saga of the government playing havoc with weapons acquisition offers an explanation for, and clues for resolving, the under-equipped state of Canada's military.

## The Canadian War on Queers

National Security as Sexual Regulation

Gary Kinsman and Patrizia Gentile

From the 1950s to the late 1990s, agents of the state spied on, interrogated, and harassed gays and lesbians in Canada, employing social ideologies and other practices to construct their targets as threats to society. Based on official security documents and interviews with gays, lesbians, civil servants, and high-ranking officials, this path-breaking book discloses acts of state repression and forms of resistance that raise questions about just whose national security was being protected. Passionate and personalized, this account of how the state used the ideology of national security to wage war on its own people offers ways of understanding, and resisting, contemporary conflicts such as the “war on terror.”

## Surveillance

Power, Problems, and Politics

Edited by Sean P. Hier and Josh Greenberg

Surveillance is commonly rationalized as a solution for existing problems such as crime and terrorism. This book explores how surveillance, often disguised as risk management or harm reduction, is also at the root of a range of social and political problems. Canadian scholars from diverse disciplines interrogate the moral and ideological bases as well as the material effects of surveillance in policing, consumerism, welfare administration, disaster management, popular culture, moral regulation, news media, social movements, and anti-terrorism campaigns.

## Pearson's Peacekeepers

Canada and the United Nations  
Emergency Force, 1956–67  
Michael K. Carroll

In 1957, Lester Pearson won the Nobel Peace Prize for creating the United Nations Emergency Force during the Suez crisis. The award launched Canada's enthusiasm and reputation for peacekeeping. Pearson's Peacekeepers explores the reality behind the rhetoric by offering a detailed account of the UNEF's decade-long effort to keep peace along the Egyptian-Israeli border. While the operation was a tremendous achievement, the UNEF also encountered formidable challenges and problems. This nuanced account of Canada's participation in the UNEF challenges perceived notions of Canadian identity and history and will help Canadians to accurately evaluate international peacekeeping efforts today.

## The Paradoxes of Peacebuilding Post-9/11

Edited by Stephen Baranyi

Is sustainable peace an illusion in a world where foreign military interventions are replacing peace negotiations as starting points for postwar reconstruction? What would it take to achieve durable peace? This book presents six provocative case studies authored by respected peacebuilding practitioners in their own societies. The studies address two cases of relative success (Guatemala and Mozambique), three cases of renewed but deeply fraught efforts (Afghanistan, Haiti, and the Palestinian Territories), and the case of Sri Lanka, where peacebuilding was aborted but where the outlines of a new peace process can be discerned.

## Cautious Beginnings

Canadian Foreign Intelligence,  
1939–51

Kurt F. Jensen

Kurt F. Jensen argues that Canada was a more active intelligence partner in the Second World War alliance than has previously been suggested. He describes Canada's contributions to Allied intelligence before the war began, as well as the distinctly Canadian activities that started from that point. He reveals how the government created an intelligence organization during the war to aid Allied resources. This is a convincing portrait of a nation with an active role in Second World War intelligence gathering, one that continues to influence the architecture of its current capabilities.

## The Face of Imperialism

Michael Parenti

In the last half-century we have witnessed a dramatic expansion of American corporate power into every corner of the world, accompanied by an equally awesome growth in U.S. military power. This book analyzes this global empire: what interests it serves and its effects on the peoples of the world and their struggles for real democracy and social justice. Michael Parenti redefines empire and imperialism to connect the current crisis in America to its own bad behavior worldwide.

## Power and Terror

Conflict, Hegemony, and the Rule of Force

Noam Chomsky

This updated and revised edition explores the dynamics of power relationships and international negotiations, and the use of terror between the Western countries and the nations of the Middle East in the post-9/11 era. Chomsky looks back to patterns since the Second World War to show how acts of terrorism today cannot be understood outside the context of Western power and state terror throughout the world, especially in the Middle East. This new edition offers the best opportunity to follow Chomsky's analysis in its development during the ten years since 9/11.

## Hearts of Darkness

Torturing Children in the War on Terror

Henry A. Giroux

The United States embarked on a war on terror that defended torture as a matter of official policy. As torture became normalized in the Bush era, it not only corrupted American ideals but also passed over into sanctioning the unimaginable: the torture of children. This book documents cases of child torture by American military personnel, several of which are little known to Americans. Giroux challenges the Obama administration to address these shameful practices. But he also raises questions about the collusion of the media, educators, and the criminal justice system that allowed these conditions to emerge.

The history of U.S.-North Korean relations provides important lessons for negotiators on how *not* to deal with dangerous adversaries and also on how to create accommodations useful to each side. ## The ABCs of Human Survival

A Paradigm for Global Citizenship

Arthur Clark

*The ABCs of Human Survival* examines the effect of militant nationalism and the lawlessness of powerful states on the well-being of individuals, local communities, and global citizenship. Based on the analysis of world events, Dr. Arthur Clark presents militant nationalism as a pathological pattern of thinking that threatens our security, while emphasizing effective democracy and international law as indispensable frameworks for human protection. Within the contexts of history, sociology, philosophy, and spirituality, *The ABCs of Human Survival* calls into question the assumptions of consumer culture and offers, as an alternative, strategies to improve overall well-being through the important choices we make as individuals.

## Global Development and Human Security

Edited by Robert Picciotto,  
Michael Clarke, and Funmi Olonisakin

*Global Development and Human Security* explores the possibility of connecting all countries to the global economy while managing security risks. The complex intersection between security and development policies has not been adequately explored. Frail states that lack sound market and security institutions are weak links in an interconnected global system, discouraging engagement from the insular culture of development agencies. In a world beset by “problems without passport” – infectious diseases, pollution, conflict spillovers, terrorism – a new paradigm should supplant the now obsolete development consensus. The resulting volume seeks to build bridges of understanding between the development community and the security establishment.

## The United Nations and Nuclear Orders

Edited by Jane Boulden, Ramesh Thakur, and Thomas G. Weiss

Recent tensions surrounding the nuclear ambitions of North Korea and Iran, as well as shocking revelations about A.Q. Khan's atomic bazaar, have drawn attention to the role of the United Nations in addressing a host of nuclear challenges. *The United Nations and Nuclear Orders* sheds light on the past, present, and future roles of the UN in responding to the threats and challenges posed by nuclear weapons. This book examines UN actors, tools, and issues associated with the changing nature of the environment in which it operates, and the ways in which it responds to technological and political problems.

## The United Nations, Intra-State Peacekeeping and Normative Change

Esref Aksu

This book, available for the first time in paperback, explores the evolving role of the United Nations in peace, security and governance through the window of one of its most contentious, yet least understood, practices: active involvement in intra-state conflicts as epitomised by UN peacekeeping. Drawing on the conceptual tools provided by the "historical structural" approach, this study seeks to understand how and why the international community continuously reinterprets or redefines the UN's role in intra-state conflicts. One of the original aspects of the study is its analytical framework, where the conceptualisation of "normative basis" is closely connected with the institutionalised values in the UN Charter such as state sovereignty and human rights.

## Preventing Genocide

Practical Steps toward Early Detection and Effective Action

David A. Hamburg

Dr. David Hamburg's groundbreaking work on the prevention of genocide has stimulated a wide range of research, education, and action worldwide. It examines the roots causes of genocide, describes the pillars of prevention, and it considers what can be done to build and maintain these pillars. A new introduction and two new concluding chapters for the paperback edition track recent developments, including Kofi Annan's work in Kenya and the establishment of the Genocide Prevention Task Force in the U.S. and the EU Centre on Genocide Prevention. It explores the significant steps that have been taken to diminish the nuclear dangere. A new chapter at the end of the book is devoted to "pioneers of prevention" such as Desmond Tutu, Sir Brian Urquhart, and Amartya Sen.

## Inside Jihadism

Understanding Jihadist Movements Worldwide

Farhad Khosrokhavar

The most organized force against Western capitalism since the Soviet era, jihadism is multifaceted and complex, much broader than Al-Qaeda alone. In the first wide-ranging introduction to today's jihadism, Khosrokhavar explains how two key movements influence jihadi activists. One, based in the Middle East, is more heavily influenced by Islamic religion and political thought. The other, composed of individuals living in Europe and Western democracies, is motivated by secular as well as religious influences. Khosrokhavar interprets religious and lesser-known Arabic texts and the real world political dynamics that make jihadism a growing threat, and concludes with recommendations to safeguard democracies from future jihadism.

## The Empire's New Clothes

Barack Obama in the Real World  
of Power

Paul Street

Although mainstream journalists have noted discrepancies between Obama's original vision and reality after his first year in office, Paul Street uniquely measures Obama's record against the expectations of the progressive agenda many of his supporters expected him to follow. The list of Obama's weakened policies is startling: the business-friendly measures, the lack of support for the growing mass of unemployed and poor, the dilution of his health reform agenda, the passage of a record-setting Pentagon budget, and the escalation of U.S. military violence in Afghanistan, Pakistan, Yemen, and Somalia. Street's account reveals how deeply beholden Obama is to existing dominant domestic and global hierarchies and doctrines.

# Studies in Canadian Military History Series

Series editor: Dr. Dean F. Oliver, Canadian War Museum

The Canadian War Museum, Canada's national museum of military history, has a three-fold mandate: to remember, to preserve, and to educate. The Studies in Canadian Military History series, published by UBC Press in association with the Canadian War Museum, extends this mandate by presenting the best contemporary scholarship to provide new insights into all aspects of Canadian military history, from earliest times to recent events. The work of a new generation of scholars is especially encouraged and the books employ a variety of approaches – cultural, social, intellectual, economic, political, and comparative – to investigate gaps in the existing historiography. The books in the series feed immediately into future exhibitions, programs, and outreach efforts by the Canadian War Museum.
